

Privacy When You Want It, Space When You Need It

The Tribute 2 is designed for homeowners who enjoy a peaceful daily routine while still having plenty of room to host family and friends. A long covered front porch welcomes you inside, where a den just off the entry creates a dedicated space for a home office, reading room, or hobby area that stays comfortably removed from the home's main traffic flow.

Moving further inside, the layout opens into a bright great room connected to the kitchen and breakfast area. A central island keeps the cook engaged with conversation around the optional fireplace or at the table, while the breakfast nook looks out to the covered patio—an inviting spot for casual meals, morning coffee, or stepping outside to enjoy the fresh air.

Guest and family spaces are thoughtfully arranged for

comfort and flexibility. Three secondary bedrooms share a full bath along one side of the home, with convenient access to the laundry and the three-car garage entry nearby. This wing works beautifully when the house is full of visitors, yet remains quiet and contained when everyday life returns to a slower pace.

On the opposite side, the primary suite offers a relaxing retreat with a spacious bedroom, walk-in closet, and dual-sink bath. A nearby powder room serves guests, while the large bonus room above the garage provides extra flexibility—perfect for a media room, hobby studio, or visiting family—without disrupting the easy, single-level flow of the main floor.
